

EnhancedScheduler(Bêta)

Event creation :

Use the "+" button or click directly in the EnhancedScheduler's empty field to create a new event.

An intuitive interface opens, allowing you to enter event details.

With the EnhancedScheduler, you have the ability to set up recurring and special events, similarly to what was possible with Niagara.

A major innovation of the EnhancedScheduler is the introduction of the "Multi Days" event type, and the ability to **create events with the same name**.

This event type, Multi Days, allows you to schedule activities that span multiple days, an option that was not available in the previous Niagara system.
