

RemoveHistory

Summary

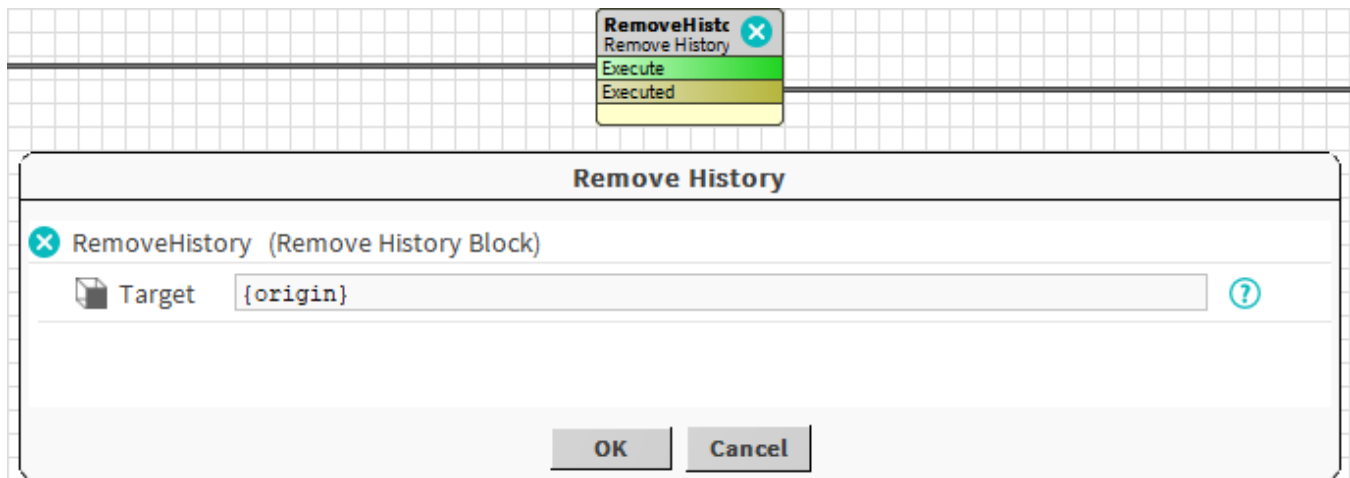

This block is used to remove the histories associated to a ControlPoint. This block will remove the histories in the HistoryDatabase, it won't remove the historyExtensions from the point.

Implementation

- Drag and drop the block from the palette
- Link the "execute" action from the "executed" topic of the previous block

Example

This block removes the histories associated to the origin.

Properties

- *Target:* [SFormat](#) to define the target controlPoint which histories will be removed.

Behavior: DO

The histories are removed.

Behavior: UNDO

Nothing happens.
